

## The Real Problems

### The enormous cost of Fraud

- In 2015, hackers stole \$400 - \$500 billion in cash and data. *Source: McAfee.*
- 1 trillion Personal records stolen from central corporate and government servers annually. More than 100 million people each year are victims of identity theft. *Source: Gemalto.*

Lack of transparency

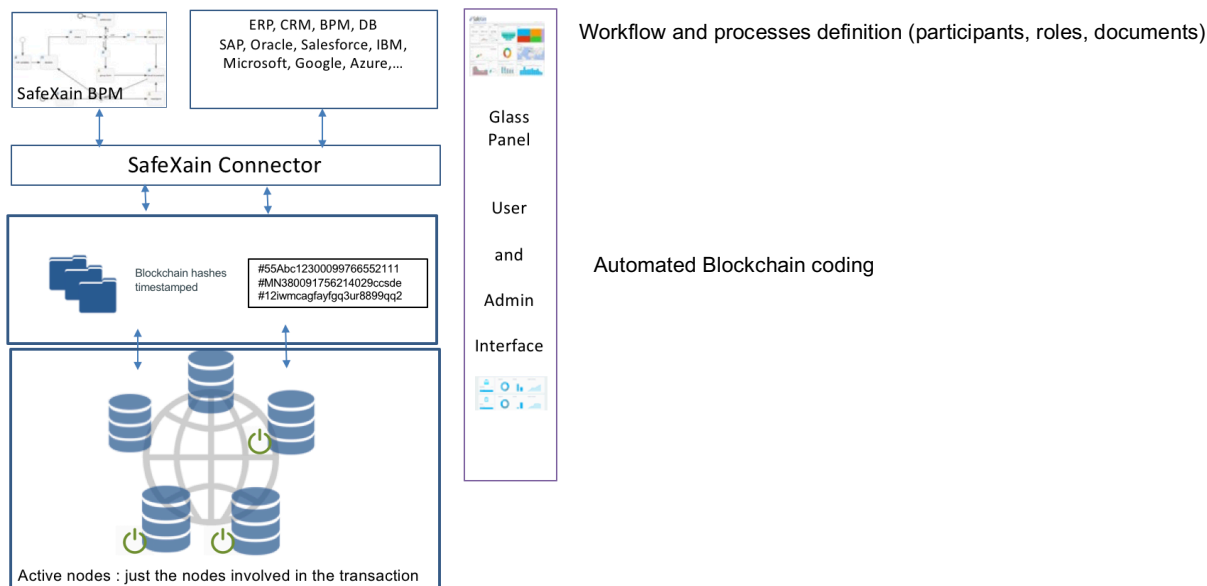

Bureaucracy makes slow processes

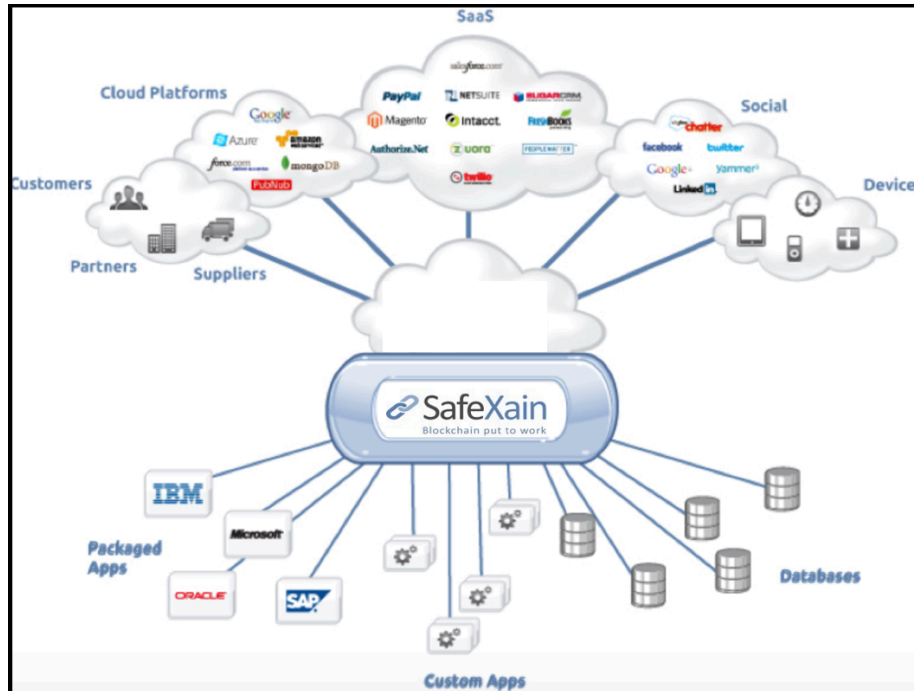

Lack of trust

## SafeXain: Blockchain put to work

**SafeXain** is a private blockchain platform that allows the integration into blockchain technology of any process in an easy and fast way.

- ID Security
- Data and Documents shared under one single platform
- Blockchain Security
- Instantly shared
- Secure transaction

### Blockchain Benefits

-  Transparency
-  Security
-  Trust
-  Top resiliency
-  Process automation through Smart Contract

### SafeXain Benefits

-  Clicking, no coding
-  Flexibility
-  Private node federation
-  Openness, connectivity to other system
-  High TPS rate (100.000 TPS)
